                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               The invention relates to an isolated nucleic acid molecule (I) comprising a nucleotide sequence given in Tables 1-9 (ABV00010-ABV62213) of the specification or its complement. (I) is useful for: (a) assessing whether a parient is afflicted with prostate cancer; (b) monitoring the

The invention relates to an isolated nucleic acid molecule (I) comprising a nucleotide sequence given in Tables 1-9 (ABV00010-ABV62213) of the specification or its complement. (I) is useful for: (a) assessing whether progression of prostate cancer: (b) monitoring the progression of prostate cancer: (b) monitoring the efficacy of a test compound to inhibit prostate cancer in a patient; (d) assessing the efficacy of a therapy for inhibiting prostate cancer in a patient; (e) selecting a composition for inhibiting prostate cancer in a patient; (f) assessing the prostate cell carcinogenic potential of a compound; (g) determining whether prostate cancer has metastasized in a patient; (h) assessing the aggressiveness or indolence of prostate cancer in a patient; (i) is also useful as a pharmacodyanamic or pharmacogenomic marker
                                                                                                               Novel isolated nucleic acid molecule associated with cancerous state of prostate cells and correlating with presence of prostate cancer, useful for detecting presence of prostate cancer.
                                                                                                                                                                                                                Claim 1; Page 7483; 11750pp; English

548244
NMD2 protein - yeast (Saccharomyces cerevisiae)
NyAlternate names: IFS1 protein; protein YHR077c
C;Species: Saccharomyces cerevisiae
C;Date: 28-Oct-1994 #sequence revision 10-Feb-1995 #text_change 23-Mar-2001
C;Accession: S4824; S46815; S64648; S64738
R;He, F.; Jacobson, A.
submitted to the EMBL Data Library, September 1994
A;Description: Identification of a novel component of the nonsense-mediated mRNA decay;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  675

nuclear/mitotic apparatus protein - African clawed frog
C;Species: Xenopus laevis (African clawed frog)
C;Date: 22-Oct-1999 #sequence_revision 22-Oct-1999 #text_change 21-Jul-2000
C;Accession: T30336
R;Merdes, A.; Ramyar, K.; Vechio, J.D.; Cleveland, D.W.
Cell 87, 447-458, 1996
A;Title: A complex of NuMA and cytoplasmic dynein is essential for mitotic spindle assemt
A;Reference number: Z20828; MUID:97053784; PMID:8898198
A;Accession: T30336
A;Status: preliminary; translated from GB/EMBL/DDBJ

promoter regio With the EMBL Data Library, December 1995
A;Description: The sequence of C. elegans cosmid C04F6.
A;Reference number: Z18346
A;Accession: T15409
A;Accession: T15409
A;Molecule type: DNA
A;Molecule type: DNA
A;Molecule type: DNA
A;Reference: EMBL, DDBJ, EVAYT', 188-390, 'TL', 393-613, 'N', 615-688, 'F', 690-71572, 'KEAR', 1577-1603 <NHA>
A;Reference: EMBL, U22335, NID: 91125760; PID: 91125763; PIDN: AAA83587.1; CESP;Vit-5
C;Comment: In Caenorhabditis, vitellogenins are synthesized by 32 cells building the interence of the synthesized by 32 cells building the interestion of the gonad. Vitellogenin 5 undergoes little if any processing before be A;Cross-references: GB:X03044; NID:g6919; PIDN:CAA26849.1; PID:g6920
A;Note: the authors translated the codon TTT for residue 1318 as Thr
